

Challenge – Score card

Dallas basketball team has requested a tool for its score keepers.

Tool needs to have an interface where user can enter following data.

Number of made two pointers, total 2 pointers attempted , number of made 3 pointers , total 3 pointers attempted, number of made free throws , total free throw attempts. Tool also needs to have a capability to calculate how efficient team was in each category along with total efficiency.

Instructions:

- (1) Use HTML to create the interface.
- (2) Once challenge is completed email your code along with any instructions to
ramneek.singh@gmfinancial.com, deryk.graves@gmfinancial.com,
jennifer.rodgy@gmfinancial.com and marvin.manning@gmfinancial.com
- (3) Use your imagination when creating the tool to see how the final screen needs to look and feel.

Good Luck.
